Ghulam Jalani

Software Engineer | JavaScript, React.js, Node.js, SQL

Lahore, Pakistan | 0321-1422065 | gjalani926@gmail.com | linkedin.com/in/ghulam-jalani | github.com/Jalani128 | Portfolio

Professional Summary

Software engineer and BS Information Technology graduate based in Lahore, with hands-on experience building and deploying full-stack web applications in JavaScript, TypeScript, React.js, Node.js and Express.js. Has shipped live products, including a property valuation platform with an admin dashboard, company websites backed by custom CMS admin panels, and is building a multi-tenant school management system. Comfortable with REST APIs, relational and NoSQL databases, Git-based teamwork and agile sprints. A self-driven, quick learner looking to grow as an Associate Software Engineer and pick up new technologies and platforms on the job.

Technical Skills

- **Languages:** JavaScript (ES6+), TypeScript, SQL, C++, Solidity
- **Frontend:** React.js, Redux, React Router, HTML5, CSS3, Tailwind CSS, Bootstrap, Framer Motion, GSAP
- **Backend:** Node.js, Express.js, RESTful APIs, JWT Authentication, RBAC, Middleware, Socket.IO, Stripe and PayPal integration
- **Databases:** MySQL, PostgreSQL, MongoDB / Mongoose (Aggregation, Indexing), Data Modeling
- **Tools and Deployment:** Git/GitHub, Postman, npm, Vite, Docker (basics), Vercel, Netlify, Heroku, AWS (basics)
- **Ways of Working:** Agile sprints, code reviews, daily standups, continuous deployment

Professional Experience

MERN Stack Developer, Sysmatixx Lahore | 06/2024 – Present

- Develop and maintain full-stack web applications with React.js, Node.js, Express.js and MongoDB in an agile team
- Build secure RESTful APIs with JWT authentication, request validation and centralized error handling
- Integrated Stripe and PayPal payment gateways for secure checkout and online transaction workflows
- Optimize database queries and indexing strategies to keep response times low under concurrent load
- Build responsive interfaces with React.js, Tailwind CSS and Bootstrap for a consistent cross-device experience
- Work in sprints with code reviews, daily standups, Git/GitHub version control and continuous deployment

Blockchain Developer Intern, Dev & Mark Lahore | 03/2024 – 06/2024

- Designed and deployed Solidity smart contracts for a vehicle management system with registration and ownership transfer
- Connected smart contracts to a React frontend with Web3.js so users could interact with the application directly
- Applied secure coding practices and reviewed contracts against common vulnerabilities to protect data integrity

Projects

Assets Appraisals — Property Valuation Platform Live Demo | Admin Panel

- Architected and deployed a full-stack property appraisal platform with real-time data synchronization
- Built an admin dashboard with role-based access control (RBAC), user management and analytics visualization
- Reduced page load time by 40% through code splitting and lazy loading
- Tuned database indexes and queries to handle 1,000+ concurrent requests; maintained 99%+ production uptime

Tech: React.js, Node.js, Express.js, MongoDB, Tailwind CSS, JWT, REST APIs

EduManage — Multi-School Management System In development

- Building a multi-tenant SaaS platform where each school's data is isolated through JWT-scoped tenant IDs and a Mongoose query plugin
- Designed four role-based dashboards (Admin, Teacher, Student, Parent) with server-enforced RBAC middleware and client route guards
- Covers enrollment, attendance, timetables, homework, exams and fees, with Chart.js analytics and real-time Socket.IO notifications
- Hardened the Express API with Helmet, rate limiting and Zod validation; containerized with Docker

Tech: React.js, TypeScript, Vite, Tailwind CSS, Node.js, Express.js, MongoDB, Socket.IO, JWT

IntelliVex Technologies — IT Company Website and CMS Live: intellivex.vercel.app

- Built the corporate website for an IT services company covering web, mobile, AI, data science and cloud solutions
- Developed a custom admin panel so the team manages services, products, portfolio, industries and testimonials without code changes
- Added a rich-text editor (TipTap) and schema-validated forms (React Hook Form + Zod) for content editing
- Delivered smooth GSAP / Framer Motion animations with per-page SEO meta tags

Tech: React.js, Vite, Tailwind CSS, GSAP, Framer Motion, REST APIs, Zod

Aureon Ventures & Technologies — IT Services Website GitHub

- Built a bilingual (English / Arabic) website for a Saudi IT services firm with dedicated pages for Dynamics 365, managed IT support, energy and infrastructure
- Structured content in data modules so services and pages can be updated without touching components

Tech: React.js, React Router, Framer Motion, Vite

EcoSun Solutions — Renewable Energy Company Website Live: ecoosunsolutions.com

- Built a responsive, multi-page website for a turnkey solar and renewable-energy provider
- Developed inquiry and quote-request forms backed by an Express.js API with validation and MongoDB storage
- Optimized for mobile, page speed and on-page SEO to support organic lead generation

Tech: React.js, Node.js, Express.js, MongoDB, Tailwind CSS

Blockchain Vehicle Management System

- Built a dashboard for registering vehicles and transferring ownership on-chain, extending the internship contracts

Tech: Solidity, Web3.js, React.js

Education and Certifications

BS Information Technology, Superior University Lahore | 2019 – 2023

Certifications: MERN Stack Development (Meta) | Frontend Development (Coursera) | SQL Fundamentals | NoSQL Database Design | Computer Networks
