Professional Summary

MERN Stack Developer with 1+ year of hands-on experience designing, developing, and deploying production-grade fullstack web applications. Proven expertise in building scalable, responsive platforms using React.js, Node.js, Express.js, and MongoDB. Experienced in integrating payment gateways (Stripe, PayPal), implementing robust authentication systems, and delivering RESTful APIs. Strong foundation in blockchain technology. Adept at working in agile environments and collaborating cross-functionally to deliver high-quality solutions.

Professional Experience

MERN Stack Developer – Sysmatixx

06/2024 – Present (1 Year), Lahore

- Developed and maintained full-stack web applications using React.js, Node.js, Express.js, and MongoDB in agile environment
- Built secure RESTful APIs with JWT authentication, data validation, and implemented comprehensive error handling
- Integrated payment gateways (Stripe & PayPal) for secure online transactions and checkout workflows
- Optimized MongoDB queries and database indexing strategies to handle high-concurrency scenarios efficiently
- Collaborated in agile sprints with code reviews, daily standups, version control (GitHub), and continuous deployment
- Developed responsive UI/UX with React.js, Tailwind CSS, and Bootstrap ensuring seamless cross-device experience

Blockchain Developer Intern – Dev & Mark

03/2024 – 06/2024, Lahore

- Designed and deployed Solidity smart contracts for vehicle management with ownership transfer and registration features
- Integrated blockchain backend with React frontend to enable user interactions with decentralized applications (DApps)
- Implemented secure coding practices and smart contract auditing procedures ensuring data integrity

Live Projects

Assets Appraisals - Property Valuation Platform

Live Demo: https://lnkd.in/dzf8fvCq | Admin Panel: https://lnkd.in/dJA3Zbzu | Deployed: https://lnkd.in/divwszCV

- Architected and deployed full-stack property appraisal platform serving multiple concurrent users with real-time data synchronization
- Implemented comprehensive admin dashboard with role-based access control (RBAC), user management, and analytics visualization

- Achieved 99%+ uptime in production environment through robust error handling and deployment best practices
- Optimized frontend performance with code splitting and lazy loading—reducing load time by 40%
- Built responsive interface with React.js and Tailwind CSS, optimized for mobile and desktop platforms
- Database optimization: MongoDB indexing and query optimization handling 1000+ concurrent requests
- Technologies: React.js, Node.js, Express.js, MongoDB, Tailwind CSS, JWT Authentication, RESTful APIs

Blockchain Vehicle Management System

- Designed smart contract for vehicle registration and ownership transfer with secure blockchain integration
- Integrated smart contract with frontend dashboard enabling users to interact with decentralized system
- Technologies: Solidity, Web3.js, React.js, Blockchain Integration

Technical Skills

- Languages: JavaScript (ES6+), Solidity, SQL, C++
- Frontend: React.js, Redux, React Router, HTML5, CSS3, Tailwind CSS, Bootstrap, Responsive Design
- Backend: Node.js, Express.js, RESTful APIs, JWT Authentication, Middleware Development
- Database: MongoDB (Aggregation, Indexing, Optimization), MySQL, PostgreSQL, Data Modeling
- Blockchain: Solidity, Smart Contracts, DApp Integration, Web3.js
- Payment Integration: Stripe, PayPal, PCI Compliance
- Tools & Platforms: Git/GitHub, VS Code, Postman, Thunder Client, npm, Agile Workflows
- Deployment: Vercel, Netlify, Heroku, AWS Basics

Education

BS Information Technology – Superior University (2019–2023), Lahore

Certifications & Courses

- MERN Stack Development - Meta
- Frontend Development - Coursera
- SQL Fundamentals
- NoSQL Database Design
- Computer Networks
